

Teleconference between the FAA and BWI Roundtable
July 3, 2019, 9:00-9:30 AM

Participants

Drew Roth
Maria Stanco
Jenny Soloman

Topics

- What can we talk about - can't talk with the RT about anything in the lawsuits. Working level technical discussions with participants in the Tech. Committee are possible. FAA to explore that.
- Spring 2020 for final design for current FAA proposal/determine environmental review then. EPA or Catex determined then.
- Mr. Roth provided the BWI Roundtable's roadmap to creating a new proposal to augment the current proposal, for consideration by the FAA. Mr. Roth expects to have a Roundtable-approved problem statement at the July 9th meeting, and a proposed solution to address the problems in the problem statement in October.
- The proposed solution will be created by the Roundtable Technical Committee, the MAA, and industry representatives. It will undergo noise modeling and analysis by HMMH, at the direction of the MAA.
- The goal is for the proposed solution to be ready in October to have the backing of the Roundtable, the MAA, and industry.

Actions

- Mr. Roth to share the approved problem statement when it is available.
- Next teleconference to be scheduled by the FAA in the August time frame.
